Join Gefeld 77 Mal 90 Commentaire Cooper Cat, Wally Wolf and Bruno Bear and set out on a colorful journey with Toon Blast! The game can be synced across multiple devices so that you can pick up where you interrupted, regardless of whether you are using a phone or tablet. Team up with your friends and compete against players from all over the world. If you need help conquering the leaderboards, check out our Toon Blast tips, cheats and tricks to be successful!1. Holding on to those boosters has different effects that will help you clear the board, all of which are very useful. Unfortunately they are a little hard to get in the game. You only get a couple once when you open a Toon chest or star chest. That's why you should avoid these boosters unless you really need them. If you have one of two moves away from completing a level that is completely stuck, go ahead and use that booster. Otherwise, raise the level and see if you're lucky a second time. 2. When you enter level 15, when you reach level 15, you will unlock the Star Chest. The star's chest is unlocked every time it accumulates a total of 20 stars. However, stars earned before level 15 do not go in the direction of unlocking the chest of the first star. In other words, the effort to get a previous star will be wasted. To get the most out of each star, focus on getting a star chest before aiming to earn 3 stars in each level. 3. Join the team or create yourself conquer level 20 and you can join the team. You can join an existing user or create your own. Creating your own team will cost you a lot of coins and there is no guarantee that you will get a teammate any time soon, so it may be better to join an existing team so as not to waste valuable coins. When you join a team, you connect you with other players who can give you extra life when you run out. It's a good way to keep playing without waiting long. Play fair and take the time to give extra life to teammates you need. You can also compete with other players with your teammates, so the team play component of the game will be added. 4. Set up big combos Analyze your board first before you start matching blocks. Clear a few blocks to see if there are any smaller clusters to be grouped. Instead of randomly matching a bunch of three-block combinations, try setting up a block that you can combine. Keep in mind that the more blocks you combine at once, the better. You get special blocks every time you combine four or more, so try aiming for them whenever you have a chance. Always be wary of the best combos you can set before you move. 5. As mentioned earlier in clearing with rockets and disco balls, combining more tiles will help you clear the board faster. Combining five blocks of the same color creates a Rocket that clears the entire line of the block. Combine 6 blocks to create a bomb x 3 to 3 areas. Combine 9 or more to create a great disco ball that removes all instances of a particular color. Use these special pieces strategically to solve puzzles quickly. 6. Combining special pieces This is a bit hard to pull off, but it's definitely worth the effort. When creating special pieces like rockets and bombs, make sure you can keep them next to each other. If you do this, you will be able to combine special pieces for a better effect. If you combine the two Rockets, you can delete two line at once. Two bombs create a bigger explosion. Two disco balls obliterated the entire board!Pieces, even if not of the same type. Try all possible combinations to see how they will help you solve those puzzles. 7. Trick the Game for More Live's Noon Blast is such an addiction that it's only a matter of time before you get through life. You can ask your teammates for extra life, but they can give you so much more before you run out again. You can do it in a boring way and wait for a few hours to pass for your life to play. Or you can fool the game into thinking that enough time has passed so that you can get a life faster. All you have to do is go to your phone's date and time settings. Move the time a few hours ago and return to the game. You will find that your life is replenished. You can do this as often as you want so you don't have to wait to play. Just make sure to fix your phone time when you may finish playing or get confused!8. Buy more boosters If you miss our first tip and end up using all boosters, you always have the option to buy more and of course you should use it wisely if you buy or even make a hole in your wallet. Decide in advance whether your goal is to get more stars or go through as many levels as possible. You shouldn't need too many boosters just to go through the levels, because you can keep trying until you succeed. But after gaining the biggest stars in each level, you may need to spend more boosters. It's often necessary to have one small push to get that last star, so it's better to use boosters than start over. Clear these blocks and climb the leaderboard with the help of our Toon Blast tips and tricks! Improve this article by adding citations to trusted sources. Join Gefeld 77 Mal 90 Commentaire Cooper Cat, Wally Wolf and Bruno Bear and set out on a colorful journey with Toon Blast! The game can be synced across multiple devices so that you can pick up where you interrupted, regardless of whether you are using a phone or tablet. Team up with your friends and compete against players from all over the world. If you need help conquering the leaderboards, check out our Toon Blast tips, cheats and tricks to be successful!1. Holding on to those boosters has different effects that will help you clear the board, all of which are very useful. Unfortunately they are a little hard to get in the game. You only get a couple once when you open a Toon chest or star chest. That's why you should avoid these boosters unless you really need them. If you have one of two moves away from completing a level that is completely stuck, go ahead and use that booster. Otherwise, raise the level and see if you're lucky a second time. 2. When you enter level 15, when you reach level 15, you will unlock the Star Chest. The star's chest is unlocked every time it accumulates a total of 20 stars. However, stars earned before level 15 do not go in the direction of unlocking the chest of the first star. In other words, the effort to get a previous star will be wasted. To get the most out of each star, focus on getting a star chest before aiming to earn 3 stars in each level. 3. Join the team or create yourself conquer level 20 and you can join the team. You can join an existing user or create your own. Creating your own team will cost you a lot of coins and there is no guarantee that you will get a teammate any time soon, so it may be better to join an existing team so as not to waste valuable coins. When you join a team, you connect you with other players who can give you extra life when you run out. It's a good way to keep playing without waiting long. Play fair and take the time to give extra life to teammates you need. You can also compete with other players with your teammates, so the team play component of the game will be added. 4. Set up big combos Analyze your board first before you start matching blocks. Clear a few blocks to see if there are any smaller clusters to be grouped. Instead of randomly matching a bunch of three-block combinations, try setting up a block that you can combine. Keep in mind that the more blocks you combine at once, the better. You get special blocks every time you combine four or more, so try aiming for them whenever you have a chance. Always be wary of the best combos you can set before you move. 5. As mentioned earlier in clearing with rockets and disco balls, combining more tiles will help you clear the board faster. Combining five blocks of the same color creates a Rocket that clears the entire line of the block. Combine 6 blocks to create a bomb x 3 to 3 areas. Combine 9 or more to create a great disco ball that removes all instances of a particular color. Use these special pieces strategically to solve puzzles quickly. 6. Combining special pieces This is a bit hard to pull off, but it's definitely worth the effort. When creating special pieces like rockets and bombs, make sure you can keep them next to each other. If you do this, you will be able to combine special pieces for a better effect. If you combine the two Rockets, you can delete two line at once. Two bombs create a bigger explosion. Two disco balls obliterated the entire board!Pieces, even if not of the same type. Try all possible combinations to see how they will help you solve those puzzles. 7. Trick the Game for More Live's Noon Blast is such an addiction that it's only a matter of time before you get through life. You can ask your teammates for extra life, but they can give you so much more before you run out again. You can do it in a boring way and wait for a few hours to pass for your life to play. Or you can fool the game into thinking that enough time has passed so that you can get a life faster. All you have to do is go to your phone's date and time settings. Move the time a few hours ago and return to the game. You will find that your life is replenished. You can do this as often as you want so you don't have to wait to play. Just make sure to fix your phone time when you may finish playing or get confused!8. Buy more boosters If you miss our first tip and end up using all boosters, you always have the option to buy more and of course you should use it wisely if you buy or even make a hole in your wallet. Decide in advance whether your goal is to get more stars or go through as many levels as possible. You shouldn't need too many boosters just to go through the levels, because you can keep trying until you succeed. But after gaining the biggest stars in each level, you may need to spend more boosters. It's often necessary to have one small push to get that last star, so it's better to use boosters than start over.
